OUTCOME 1

1.1 Project Overview

FlexiCore is a project aimed at developing a flexible internal management software platform that can be highly customized to meet the specific operational needs of each business. The goal is to create a “tailor-made” solution — not a rigid, one-size-fits-all system, but one that closely aligns with the workflows and business models of each client.

FlexiCore is not just a software tool, but also a consulting and implementation service, where the development team collaborates directly with businesses to analyze their actual requirements and build optimized solutions that improve operational efficiency.

In addition to the core software, the project includes a product showcase website that allows potential users to explore the system, register for trials, and access updated features. The platform also supports the creation of personalized portfolios to help individuals or businesses enhance their digital identity and branding.

1.2 MVP Products

In the initial development phase, the FlexiCore project focuses on delivering three key MVP products. Each product serves a distinct role within the overall solution ecosystem:

1.2.1 Internal Management Software

This is the core component of the system, designed to help businesses efficiently manage their daily operations.

Key features include:

- User and Role Management: Create accounts, assign roles, control access rights.
- Task Management: Create tasks, assign responsibilities, track progress.
- Basic Product & Order Management: Handle inventory, stock tracking, order processing.
- Overview Dashboard: Visual reports for monitoring performance and activity.

Interface Illustration:

1.2.2 Product Showcase Website

The website serves as the official channel where users can explore the product, understand its value, and engage with the brand. It also plays a key role in marketing and onboarding.

Main functions of the website:

- Introduce product features
- Allow users to register for trials or consultations
- View demos and user guides

The design is modern, responsive, and user-friendly across desktop and mobile devices.

Website Interface Illustration:

1.2.3 Personalized Portfolio

This unique FlexiCore feature allows users (individuals or organizations) to create a professional online portfolio that showcases their expertise, projects, and achievements.

Core functions:

- Create personal or company profile
- Add past projects with descriptions, images, and links
- Customize portfolio layout and appearance
- Share via public link or embed code

This feature helps enhance personal branding and professional credibility in the digital environment — especially valuable for freelancers, consultants, and small businesses.

Portfolio Interface Illustration:

1.3 Official website

The official website of FlexiCore serves as a comprehensive information gateway, allowing users to explore the entire product ecosystem, learn about the solution’s value, experience the software’s interface, and connect directly with the development team. The website features a modern, intuitive design, optimized for both desktop and mobile devices, ensuring easy access for users wherever they are.

Home

The website provides a comprehensive introduction to FlexiCore, offering clear and detailed information about the platform’s core features, main benefits, and planned future

developments. This section is designed to help a wide range of businesses easily understand how FlexiCore can address their unique operational needs and support their growth.

Template Demo

To assist users in better understanding and utilizing the software, the website offers instant access to product demos, comprehensive documentation, and tutorial videos. These resources enable users to explore FlexiCore's features in depth and quickly get started with the system.

Flexicore team

The website features a dedicated section introducing the founders and development team, including their expertise, professional background, and mission. This transparency fosters

trust and confidence in potential customers, assuring them of the competence and commitment behind the FlexiCore project.

1.4 Social media

After a period of dedicated development and outreach, the official FlexiCore Design fanpage has achieved an initial milestone of 413 likes and 435 followers, reflecting growing interest and positive engagement from the online community. The fanpage serves as a dynamic information and support channel for businesses and individual users interested in flexible internal management solutions.

On the FlexiCore fanpage, audiences receive regular updates on new features, product improvements, and practical case studies relevant to restaurants and small businesses. The page promotes direct communication, allowing users to reach out via Messenger for consultations, product trials, or technical support.

During the reported period, the FlexiCore fanpage recorded a total of 7,914 views, reaching 1,880 unique users, with 305 content interactions. The page also registered 56 link clicks and 1,996 visits, reflecting significant interest and engagement from the community. Notably, the number of followers increased to 540, highlighting the effectiveness of outreach efforts and a positive trend in attracting and retaining potential customers on the social media platform.

OUTCOME 2

2.1 Customer Feedback and Solutions

FlexiCore actively collected and analyzed feedback from 9 customers who used the company's web development services over the past 2 months. The results were overwhelmingly positive:

- **High satisfaction rate:**

5. Nếu đánh giá tổng thể dịch vụ của FlexiCore Design, anh/chị chấm mấy sao? (1 đến 5 sao)
9 câu trả lời

- 7 out of 9 customers rated 5 stars (~78%)
- 2 out of 9 customers rated 4 stars
- No negative feedback received

12. Nếu được, anh/chị vui lòng chia sẻ thêm 1–2 câu đánh giá ngắn về trải nghiệm khi làm việc với đội ngũ FlexiCore Design.

9 câu trả lời

Thời gian làm việc được tối ưu rất tốt, không có tình trạng trì hoãn.

Đội ngũ FlexiCore Design chuyên nghiệp, nhiệt tình và luôn lắng nghe nhu cầu của khách hàng.

Tôi đánh giá cao khả năng sáng tạo và cách làm việc linh hoạt của đội ngũ.

FlexiCore Design làm việc chuyên nghiệp, đúng tiến độ và luôn chủ động đề xuất giải pháp phù hợp

khá tốt

Portfolio của FlexiCore Design thể hiện được tính linh hoạt và khả năng tùy chỉnh theo từng doanh nghiệp

Trải nghiệm làm việc rất tích cực, đội ngũ phản hồi nhanh và giải quyết vấn đề hiệu quả.

Tôi rất ấn tượng với tinh thần cầu thị và sự nhiệt tình của cả team.

Đội ngũ làm việc chuyên nghiệp, hỗ trợ tận tâm và rất dễ trao đổi.

- Highlighted comments:
 - "Very professional", "Responsive and quick", "Creative and flexible"
- Work process praised:
 - 100% of customers confirmed that their projects were completed on time (within 2–4 weeks)
 - The software helped businesses save time and improve workflow efficiency
- Issues and resolutions:
 - 1 customer mentioned that the pricing was a bit high, but was still satisfied with the quality
 - No major technical issues were reported, confirming a stable and reliable product

Improvement Solutions Based on Customer Feedback:

1. Enhance UI Based on Customer Segments:

- Update design according to modern 2025 trends: smooth animations, micro-interactions, better color contrast, font spacing
- Offer a free or discounted UI Refresh package for customers who are not fully satisfied
- Allow flexible updates to key pages (e.g., Homepage, Product Page, About Us)

2. Optimize Website Performance:

- Perform speed checks using PageSpeed Insights
- Ensure all CTA buttons, forms, and links work correctly
- Use SEO-optimized images with alt text and descriptions
- Integrate live chat (Messenger/Zalo) or CRM forms if needed
- Provide a light audit after updates with 3–5 suggested improvements

3. Develop Easy-to-Understand User Guides:

- Create simple tutorials (PDF or video) on:
 - How to edit content
 - SEO best practices for blog posts
 - How to manage product listings, news, and form submissions
 - Maintenance checklist to keep the site in good condition

4. Implement Post-Update Review System:

- Send side-by-side comparisons of the website before and after updates
- Include a quick 5-star feedback link (Google Reviews, feedback forms)
- Use responses as testimonials for marketing

2.2. The Sales Results in 2 Months

Total recorded revenue for the past 2 months reached: *16,000,000 VND*, generated from various client projects:

Hạng mục	Số tiền (VND)	Ghi chú
Doanh thu bán sản phẩm	4.000.000	Chi Oanh app nội thất
Doanh thu bán sản phẩm	3.000.000	Chi Oanh web nội thất
Doanh thu bán sản phẩm	800.000	Anh Hoàn portfolio
Doanh thu bán sản phẩm	1.000.000	Anh Đại portfolio
Doanh thu bán sản phẩm	1.200.000	Anh Quang portfolio
Doanh thu bán sản phẩm	2.000.000	YComm web show sản phẩm
Doanh thu bán sản phẩm	2.000.000	YComm web show sản phẩm
Doanh thu bán sản phẩm	2.000.000	Anh Quang portfolio 3D
Tổng doanh thu	18.000.000	

Summary:

This result reflects the growing trust customers place in FlexiCore. Portfolio and product showcase websites accounted for a significant share of total revenue, indicating strong market interest in digital branding and online presence.

OUTCOME 3

3.1 Key Partners

1. Student partners (Testing and dissemination community):

- Students doing individual or group projects: Be partners to experience core products, pure code, and have support to explain code, give feedback on features, and help perfect the product.
- Final year students/interns: Direct users of portfolios, spreading products through social networks, introducing friends.

2. Academic partners - Universities

- Faculty of Information Technology, Faculty of Business Administration, Faculty of Graphic Design,...: Combined in the course program, graduation project or business semester.

3. Small and medium enterprises (SMEs)

- Enterprises that need to deploy internal management software at a reasonable cost: Partners to test the FlexiCore management system, long-term companionship according to the "win-win" model:
 - + Low cost in exchange for real feedback from real users.
 - + Become the first customer - easy to stick with, easy to develop additional modules as required.
4. Technology and implementation partners, Design team
- Freelancer or software implementation team: Support implementation for many businesses, reduce internal operating pressure of FlexiCore.
 - User interface design partner (UI/UX): Ensure FlexiCore products always
 - + Beautiful, modern interface, suitable for trends.
 - + Smooth user experience, easy to use for both individuals and businesses.

3.2 Key Activities

Core activities that businesses must perform to bring value to customers and maintain the business model.

- Receiving requests and consulting solutions: Working directly with customers to understand their needs, thereby providing appropriate software solutions.
- Designing interfaces and system architecture: Building user-friendly UI/UX and designing technical architecture to ensure efficiency.
- Developing websites or applications on demand: Programming and deploying systems using technologies such as React, Laravel, Node.js, etc.
- Testing and ensuring product quality: Performing testing steps to ensure the product operates stably and without errors.
- Deploying and handing over products: Putting products into real operating environments (servers, hosting, app stores...) and providing instructions for use.
- Maintenance and upgrading: Technical support, updating, upgrading features according to customer needs after handover.
- Marketing via Facebook fanpage: Promote services, find and reach new customers through social media content.

3.3 Key Resources

The most important assets that a business needs to operate its business model, create value and maintain operations.

- Software development team (Technical Team)
- + Full-stack programmers, system architects, QA, DevOps.

- + Play a role in developing, maintaining and expanding the flexible platform according to customer requirements.

- Business consulting & implementation team

- + Analyze customer operations and convert them into software requirements.

- + Be a bridge between customers and the technical team.

- FlexiCore software platform

- + Base code system, core modules can be customized and reused.

- + Is intellectual property that helps shorten deployment time.

- Technology infrastructure (Infrastructure)

- + CI/CD services, source code management tools, system monitoring.

- + Ensure the system operates stably and is easy to expand.

- Standardized documentation & implementation process

- + User manual, training, rapid implementation process (2–4 weeks).

- + Easy for customers to access and use effectively.

- Relationships with customers & technology partners

- + These relationships help expand the market and increase product reputation.

3.4 Value Propositions

- Flexible customization for each business process:

Design HRM, CRM, dashboard modules according to “the way you operate”

- Reasonable price for SMEs – putting customer benefits first:

While software like MISA AMIS is priced high, FlexiCore prioritizes appropriate costs for SMEs and small customers.

- Extremely fast deployment (2–8 weeks):

In contrast to traditional ERP 3–6 months, helping businesses operate quickly – a clear competitive advantage.

- Vietnamese support & business consulting:

Provide direct consulting, training, and answers according to Vietnamese business standards, making it easier to access foreign business tools.

- Friendly interface, easy to train:

An intuitive interface like FastWork “free api, custom support” does not require in-depth technical training.

- No customer lock-in – open source support if needed:

A big difference from locked-in platforms, allowing for maximum scalability and flexibility.

3.5 Customer Relationships

FlexiCore's goal of building customer relationships

FlexiCore aims to not only provide internal management software, but also become a long-term partner, helping businesses operate effectively and develop sustainably. Due to the nature of a "tailor-made" solution, FlexiCore's customer relationships need to be built on understanding, consulting closely with needs, continuous support and commitment to accompany after implementation.

How to build, maintain and develop relationships with each customer segment

1. Relationship building (Acquisition & Onboarding)

- In-depth consulting for each business: The FlexiCore team approaches customers through surveys, analyzes actual processes, listens to specific needs and problems.
- Demonstrating sample solutions (Demo): Organize online or in-person demos, simulating the "tailored" management process for each business, helping customers clearly visualize the value received.
- Free trial support: Provide a trial version for customers to experience in practice before committing to implementation.

2. Retention & Support

- Deployment support: FlexiCore team directly participates in analyzing, consulting, designing solutions and training software users at the enterprise.
- 24/7 technical support: Set up diverse support channels (hotline, email, chat) to quickly handle problems arising during use.
- Detailed documentation and video instructions: Provide a system of documentation and video instructions to help customers easily self-study and proactively exploit the software.
- Regular maintenance and update policy: Commit to maintaining and updating software for free or according to service packages, ensuring the system is always stable and suitable for business changes.

3. Relationship Development (Development & Upsell)

- Listen to feedback, continuously improve: Proactively survey customer opinions after each implementation phase, update new features based on actual needs.
- Consulting on solution expansion: Proposing new subsystems, features or integrating with other systems as the business develops, helping customers optimize investment efficiency.
- Organizing user communities: Building a FlexiCore community for customers to share experiences, support each other and update the latest product information.
- Customer loyalty policy: Preferential prices, services or technical support for long-term customers, customers introducing new customers.

3.6 Channels

1. Official website – Information & Conversion Center

URL: <https://flexicore-binhphthe173173s-projects.vercel.app/>

- Is the “digital face” of FlexiCore – where customers can learn comprehensively about products, features, processes and price lists.
- The website acts as the main conversion channel, leading customers from curiosity → interest → leaving consulting information or booking a demo.
- Professional, clear interface and optimized user experience (UX).

Specific functions:

- Presenting solutions by industry/field.
- Registration form for consulting or demo.
- Update knowledge articles, blogs on management & digital transformation.

2. Facebook Fanpage – Interaction & promotion bridge

- Is a channel to approach the small and medium-sized business community in a natural & friendly way.

Use for:

- Share management knowledge, digital transformation articles, product updates.
- Directly interact with customers via inbox - 1:1 consulting support.
- Build trust through educational content - bring real value.

Strengths: Facebook helps FlexiCore build communities, connect directly with decision makers (CEO, operations director, HR).

3. Facebook Ads - Customer expansion and growth tool

- Run advertising campaigns with clear goals: increase interactions, increase demo registrations or remarketing.

Target specific behavior & position:

- Business owners, managers, operations directors at companies with < 200 employees.
- Industries that need management software: education, small manufacturing, services, logistics...

Advertising format:

- Articles + visual images of software features.
- 1-minute software demo video.
- Inspirational content: "Software the way your business operates."

Clear call-to-action (CTA): "Inbox for free consultation", "Experience a demo of the system that suits your business"

4. Indirect and future support channels

- Messenger/Zalo OA: Use an automated chatbot to greet customers and provide preliminary advice before transferring to the consulting team.
- Email Marketing (later stage): Send useful information to customers who have left a form.
- YouTube/LinkedIn (expansion stage): Share user guide videos, case studies, expert interviews.

In summary:

FlexiCore applies a dual distribution model: "Inbound + Paid Traffic", combining natural conversion (website, fanpage) and targeted advertising (Facebook Ads), aiming to:

- Optimize marketing costs,
- Reach the right potential customers,

- Increase conversion from interested people to actual customers.

3.7 Customer Segments

1. Students & New Employees

Description:

- Students arranging school or recent graduates.
- Looking for a job, implementing or needing to change jobs.
- Mainly in the fields: creative, technology, marketing, engineering, business, ...

Trends:

- According to RMIT research, young people today tend to experience an average of 17 jobs in their career.

→ The need to build a clear brand icon and easily update the date of equipment issuance.

Pain points:

- Not knowing how to demonstrate their abilities to stand out from the crowd of candidates.
- Lack of design skills, not knowing how to create a beautiful portfolio or personal website.
- The CV transmission system cannot provide full features and abilities.
- Waste time struggling with complicated tools (WordPress, Canva, Figma ...).
- Limited by available templates, lack of orientation presentation content.

Priority needs:

- Fast, easy-to-use and beautiful personal website/portfolio to impress employers.
- Modern interface, customizable according to industry and personality.
- Easy to update when changing jobs, projects, orientations.

Goals to achieve:

- Have a website that shows your ability, achievements, personality and career orientation.
- Create a professional and outstanding impression at first sight when sending CV link.

- Easy to share via email, LinkedIn, QR code at interviews,...

2. Professional individuals (Freelancers, Consultants, Coaches, etc.)

Description:

- Self-employed, experienced and building a personal brand.
- Including jobs such as: design, programming, photography, coaching, training experts, etc.

Trends:

- Strong trend of personalizing commerce.
- Using websites to introduce services, connect with customers and enhance reputation.

Pain points:

- Lack of simple tools to create websites that show a professional, unique style.
- Platforms like WordPress, Wix are expensive, require a lot of time to customize, and are difficult to use for people without technology.
- Hiring a web designer is of good quality, but it is difficult to edit the content yourself later.
- Lack of a platform to conveniently manage portfolios, articles, and customer reviews.

Priority needs:

- Modern, professional-style personal website, serving the purpose of introducing services and building reputation.
- Full of necessary components: self-introduction, services, projects, sharing blog, appointment form, customer reviews, ...
- The interface can be customized but easy to edit, no technical skills required.

Goals to achieve:

- Own a "professional online profile".
- Attract potential customers via Google, social networks, events, ...
- Reinforce the image of an expert in the field of operation.

3. Small and medium enterprises (SME)

Description:

- Enterprises with 5-200 employees, operating in many fields: trade, services, production, distribution, ...
- Often lack an application management platform suitable for their own processes.

Pain points:

- Packaged software such as MISA, Kiot Viet, international ERP is too complicated, red-light or not suitable for internal processes.
- Customization features are difficult according to the needs of the tool.
- There is no internal IT team to develop and operate the complex system.
- The process is interrupted when having to use many separate software (work management, timekeeping, CRM, ...).

Priority needs:

- Internal management platform that works, is easy to develop, has reasonable cost, and supports Vietnamese.
- Prioritize software that can be customized according to actual processes instead of being forced by available templates.
- Support for rapid development, operating on cloud or on-premises platforms.

Goals to achieve:

- Synchronized management system (work, personnel, orders, documents, ...).
- Reduce failed exit information, increase operational efficiency.
- Easily expandable according to description without having to replace software.

3.8 Cost Structure

To ensure product sustainability and profitability, it is important to clearly identify the cost components for each type of service. Based on each target customer segment and implementation characteristics, the team has built two cost tables including: production costs for each product, selling price, monthly product operating costs, and estimated monthly revenue.

Product packages are divided into many levels from simple to complex such as: Personal Web Portfolio (basic and advanced packages), business management software (one-time deployment), to scalable SaaS models. Each product line has different profit margins and requires different initial investment and monthly maintenance costs.

Cost type	Web Portfolio cá nhân – Gói cơ bản	Web Portfolio cá nhân – Gói nâng cao	Phần mềm quản lý doanh nghiệp (triển khai)	SaaS	SaaS nâng cao	Total
Cost per product	150.000	300.000	1.500.000	50.000	100.000	
Selling price	300.000	1.000.000	6.000.000	300.000	600.000	
Product cost per month	291.100	586.300	2.927.400	98.400	196.800	4.100.000
Estimated revenue per month	1.800.000	3.000.000	12.000.000	900.000	1.200.000	18.900.000
Từ tháng 6/2025 - 9/2025						

The cost for each product in the initial phase is as follows: Basic Web Portfolio Package is VND 300,000, Advanced Web Portfolio Package is VND 1,000,000, Enterprise Management Software (Deployment) is VND 6,000,000, SaaS Package is VND 300,000 and Advanced SaaS Package is VND 600,000. Based on the expected sales in the initial phase, the estimated monthly revenue is VND 18.9 million, with sales of 6 basic Web Portfolio packages, 3 advanced packages, 2 enterprise deployment packages, 3 standard SaaS packages and 2 advanced SaaS packages, and each month will increase the products depending on the month.

Cost type	Web Portfolio cá nhân – Gói cơ bản	Web Portfolio cá nhân – Gói nâng cao	Phần mềm quản lý doanh nghiệp (triển khai)	SaaS	SaaS nâng cao	Total
Cost per product	150.000	300.000	1.500.000	50.000	100.000	
Selling price	500.000	1.500.000	25.000.000	300.000	600.000	
Product cost per month	291.100	586.300	2.927.400	98.400	196.800	4.100.000
Estimated revenue per month	3.000.000	5.000.000	50.000.000	900.000	1.200.000	60.100.000
Từ tháng 10/2025 - 5/2026						

The cost for each product in the following stages is as follows: Basic Web Portfolio Package is VND 500,000, Advanced Web Portfolio Package is VND 1,00,000, Enterprise Management Software (Deployment) is VND 1,000,000, SaaS Package is VND 300,000 and Advanced SaaS Package is VND 600,000. Based on the expected sales in the next stage, the estimated monthly revenue is VND 60.1 million, with sales of 6 basic Web Portfolio packages, 3 advanced packages, 2 enterprise deployment packages, 3 standard SaaS packages and 2 advanced SaaS packages, and each month will increase the products depending on the month.

Fixed Cost / month	
Category	Cost / month
Facebook Ads	500.000
Contingency reserve	4.000.000
Other auxiliary tools	100.000
Depreciation expense	5.000.000
Total monthly cost = 9,600,000 VND	

Service Type	Monthly Variable Cost (VND)
Web Portfolio – Basic	291,100
Web Portfolio – Premium	586,300
Business Management Software	2,927,400
SaaS – Basic Plan	98,400
SaaS – Premium Plan	196,800
Total Variable Costs	4,100,000

Regarding fixed costs, we have depreciation costs including computers, tables and chairs, etc. distributed evenly over 12 months, with a total cost of about VND 5 million per month. In addition, advertising costs are distributed evenly throughout the year, averaging about VND 500,000 per month, along with contingency costs and estimated incidental costs of about VND 4.1 million. Therefore, the total fixed costs of the project are estimated at about VND 9.6 million per month. And these costs may increase monthly due to increased products requiring additional design hire, etc.

Tháng	▼	#	Tổng doanh thu (VND)	▼	Chi phí cố định (VND)	▼	Lợi nhuận ròng (VND)	▼
1St Month			18,000,000		9,600,000		8,400,000	
2St Month			18,000,000		9,600,000		8,400,000	
3St Month			22,000,000		10,000,000		12,400,000	
4St Month			25,000,000		10,400,000		14,600,000	
5St Month			60,100,000		10,800,000		49,300,000	
6St Month			61,000,000		11,200,000		49,800,000	
7St Month			62,000,000		11,600,000		50,400,000	
8St Month			63,000,000		12,000,000		51,000,000	
9St Month			64,000,000		12,400,000		51,600,000	
10St Month			65,000,000		12,800,000		52,200,000	
11St Month			66,000,000		13,200,000		52,800,000	
12St Month			67,000,000		13,600,000		53,400,000	
Total							454,300,000	

We estimate our first year profit will be 453,300,000 VND.

3.9 Revenue Stream

1. Revenue from Web Portfolio (personal):

Designing a personal portfolio in the form of a website:

- Price ranges from 200,000 VND to 1,500,000 VND depending on the complexity, features and personalization requirements.
- Basic package: create your own available interface.
- Advanced package: support for custom design, attach personal domain name.

2. Revenue from Management Software Deployment Package (enterprise):

FlexiCore Business - "Tailored" software solution according to business processes:

- Deployment package: from 3,000,000 VND to 10,000,000 VND/project
- Depending on the number of modules (personnel, warehouse, assets, ...), level of customization, cloud/on-premise.

3. Revenue from software maintenance and upgrade services (SaaS) (for enterprise products only):

After the first month of free deployment

From the second month onwards, fees are charged according to the service package:

- Basic package: 300,000 VND/month - Basic error support, periodic data backup.
- Advanced package: 600,000 VND/month - Quick support, feature upgrades, performance optimization.
- Enterprise package: 1,200,000 VND/month - Technical priority, 24/7 support, custom reports.

4. Thank you to lecturer Trinh Trong Hung

We would like to sincerely thank Mr. Trinh Trong Hung for his dedicated guidance and valuable companionship throughout the journey of implementing the Flexicore Design project.

His profound sharing of expertise, practical experience and support in the steps from market analysis, identifying target customers to completing the product have helped us grow in both thinking and skills.

He is not only a teacher but also a great source of inspiration, always accompanying and motivating the whole group.

We wish him good health, happiness and success. The lessons from him will be valuable provisions on our development journey.

Sincerely,

Flexicore Design Group – MKT1816_DIG – SP25_EXE201
