ABOUT ME

Software Engineer with over one year of experience developing enterprise applications using Java, Spring Boot, MySQL, and RESTful APIs. Experienced in backend business logic, database design, digital signing workflows, transaction management, concurrency control, and system integration. Familiar with React.js, Node.js, MongoDB, Redis, and Docker, with a strong focus on building reliable and maintainable software systems.

WORK EXPERIENCE

Java Developer

02/2026 – 04/2026

LifeteX

- Developed RESTful APIs and backend business logic for contracts, vouchers, internal documents, signing workflows, and processing status tracking.
- Implemented document upload, search, signer management, signing history, and status management using Spring Boot and MySQL.
- Integrated backend services with Desktop Agent to support server-side and USB Token digital signing.
- Designed entities and repositories with Spring Data JPA/Hibernate and tested business workflows using Postman.
- Collaborated with frontend and Desktop Agent teams to deliver end-to-end digital signing features.

Java Developer

04/2025 – 10/2025

EcoIT

- Developed and maintained Java Spring Boot backend modules for a government public administration system.
- Built RESTful APIs for request submission, document processing, approval workflows, search, and status tracking.
- Designed MySQL schemas, wrote API specifications, and implemented workflow business logic.
- Optimized SQL queries and managed database migrations using Flyway.

Software Developer

11/2024 – 04/2025

Flexicore

- Contributed to a multi-service backend system using Java Spring Boot and Node.js/Express.
- Implemented backend business logic, RBAC, and RESTful APIs for inter-service communication.
- Developed real-time notifications and task updates using Socket.IO.
- Assisted with MySQL schema design, Redis caching, and basic gRPC research.

EDUCATION

University of Labor and Social Affairs (Hanoi Campus)

09/2021 – 12/2025

SKILL

main skills

Java (1 year) MySQL (1 year) OOP (1 year) Spring Boot (1 year)
NodeJS (< 1 year) ReactJS (< 1 year) Typescript (< 1 year)

FOREIGN LANGUAGE

English (Intermediate)

HIGHLIGHT PROJECT

MiniCoreBank (Core Banking Mini API)

11/2025 – 04/2026

Tech stack: Java, Spring Boot, Spring Data JPA, Hibernate, MySQL, Flyway, Swagger/OpenAPI

- Developed RESTful APIs for customer onboarding, account management, transaction history, and fund transfers.
- Implemented atomic money transfers using Spring transaction management to maintain data consistency.
- Applied pessimistic row-level locking with SELECT ... FOR UPDATE to prevent concurrent balance update conflicts.
- Designed ledger-based debit and credit records to support transaction traceability and auditing.
- Managed database schema changes with Flyway and documented APIs using Swagger/OpenAPI.

Employee Management & ERP System

10/2025 – 04/2026

[View project](#)

Technologies: React.js, Node.js, MongoDB, Vite

- Developed the frontend and designed backend-ready modules for an ERP web application that centralizes employee and business operations.
- Built modules for employee records, attendance, payroll, sales, purchasing, inventory and project progress tracking.
- Implemented a dashboard displaying revenue, sales, user activity, recent orders and operational statistics.
- Designed a modular and responsive user interface using React and Vite.
- Supported department-based authorization to control access to business functions and employee data.
